CAREER ORIENTATION QUEST

You can print this document and do the exercises in your own time

Introduction

The world of work is part of our lives from the day that we are born. When one grows up you gradually becomes aware of this phenomenon. The first introduction is usually through parents and close family members or friends of the family. Later when you enter school, your knowledge in this regard expands. What you realise from the outset is that most people have to work at least three-quarters of their lifespan. It will be unsatisfactory and frustrating if you have to engage in activities that you do not like or find hard to do.

But how do people make career or work-life choices? What are the factors you have to take into consideration? According to research and experience some of the most important indicators of success and happiness in respect of career choices seem to relate to finding work-related activities that you would like to do and can do easily.

The following process will try and help you to explore what you think you would find interesting and what you think you will be able to do easily, or easily learn to do.

What do I find interesting?

The world of work can be divided into different areas. These areas can be more formally according to the specific sectors of the economy, or it can be according to areas or groups of work activities that people find interesting and like to engage in.

Below you will find descriptions of 21 such Work Areas. Read the description of the Work Area and activities listed under each in order to identify the ones that interests you. The activities in this work area involve working with plants and animals, usually in an outdoor setting and it primarily relates to physical work. If you are interested in this area, you would probably enjoy

- Working on a farm with crops or cattle
- Preparing a vegetable garden
- Looking after animals
- Working in a nursery
- Trying to conserve the environment

I: Building & Construction
The building and construction work area entail activities relating to the planning and direct construction or development of buildings (e.g. manual labour, surveying). If you are interested in this area, you would probably enjoy

- Planning and overseeing building projects
- Preparing estimates of the costs involved in constructing a building
- Tiling floors of buildings and houses
- Building and repairing houses
- Construction of big buildings and roads

J: Manufacturing, Repairing and Servicing Machines
This work area entails activities where you use your hands to apply mechanical principles to practical situations (e.g. to manufacture, repair and service machines). If you are interested in this area, you would probably enjoy

- Fixing the engine of a motor car
- Installing and repairing things that work with electricity
- Mending broken things
- Doing woodwork or other handwork
- Using technical tools

K: Engineering & Related Technologies
This work area entails activities relating to designing, planning, manufacturing and managing systems, equipment and components used in the engineering and related areas. If you are interested in this area, you would probably enjoy

- Designing mechanical equipment
- Manufacturing and maintaining electrical/electronic equipment
- Designing and manufacturing systems and components in the telecommunication area
- Monitoring and operating instruments (e.g. electronic, mechanical etc.) and systems
- Manufacturing and installing technical instruments

L: Information Technology/Computer Science
Entail activities in the computer and information technology work environment (e.g. programming, system development, databases, and networks). If you are interested in this area, you would probably enjoy

- Writing computer programs
- Developing data bases
- Developing systems to solve problems with the help of computers
- Designing and installing computer equipment
• Design and implement computer systems

**M: Natural Science & Mathematics**
This work area relates to activities where it is necessary to discover, collect and analyze information about the natural and life sciences (e.g. biology, physiology, chemistry, geology, physics, and mathematics). If you are interested in this area, you would probably enjoy

• Conducting experiments in a science laboratory
• Studying plants or animals
• Using knowledge of maths and statistics in your work
• Studying physical or chemistry science matters
• Using a microscope

**N: Health Science & Technology**
This work area entails activities relating to medical science and technology that mostly refers to medical matters. If you are interested in this area, you would probably enjoy

• Studying the human body
• Treating people with ailments or injuries
• Mixing and preparing medicine
• Studying the causes of diseases
• Treating animals with ailments

Go to www.careers.co.za and look up the careers linked to these work areas. You will find them under the heading: Occupations

If you still uncertain, do the Online Career Assessment on www.careers.co.za which will assist you through a questionnaire to explore the World of Work.

It is important to remember that you need more than just interest in a work area to be successful!

What activities can I do easily or easily learn to do?

A skill is usually described as something you can do well. But how does one gain skills?
Experience in performing certain activities in a specific area or environment as well as education and training usually provides one with a set of procedures for working with that knowledge. These procedures are usually referred to when people apply the term skills.

Skills may be perceived and described in different ways. Usually we define basic skills or occupation specific skills and cross-functional or transferable skills.

- Basic skills refer to skills and knowledge that are required to work in specific areas or environments
- Cross-functional or transferable ("portable") skills are those that are common to more than one area or environment and that enable individuals to move successfully from one occupation to another.

Below you will find descriptions of eight broad skill areas. Read the activities listed under each area and decide which ones you think you are good at or can easily learn to do. Circle the Yes next to the skill areas you think you are good at or can easily learn to do or the No next to the skill areas you think you are not good at or cannot easily learn to do.

**Practical Skills**
When you have practical skills you will be able to get things done in a practical way and be able to work with your hands, using tools, machinery and equipment to build, construct and repair things.

You are probably good at or can easily learn to
